DETAILED ACTION

Receipt is acknowledged of the Amendment filed April 13, 2004.

Drawings

The drawings were received on April 13, 2004. These drawings are approved. However, the drawings are objected to because lines, numbers & letters in Figs. 1-10 are not uniformly thick and well defined, clean, durable, and black. 37 CFR 1.84(l). Corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

Claims 1-20 are allowable over the prior art of record.

The following is a statement of reasons for the allowable subject matter:

Although, TURNER ET AL. (US PAT No. 4,879,688) discloses an in-system programmable logic device, TURNER ET AL. differs from the present claimed invention because, among other things, TURNER ET AL. pertains to configuring and reconfiguring while installed in a user's system, whereas the present claimed invention pertains to a programmable logic device having the first and the second stored values are programmable during configuration of the apparatus and the product term input is programmable as any of the input signal, a digital complement of the input signal, and a predetermined logic level. Accordingly, one of ordinary skill in the art would not have been motivated to modify the teachings of TURNER ET AL. to meet the claimed limitation as set forth in the present claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
